

AGS

REPROOFER

Waterproofing additive for professional water washing

COMPOSITION

Biodegradable hyper concentrated product. Regulation No: CE 648/2004

CHARACTERISTICS

- **AGS Reproofer** restores waterproofing to garments without altering their original texture; used in conjunction with AGS **detergents** and **AGS Oxitex** and **AGS Emulsifier** strengthens washing power against the most persistent stains
- **AGS Reproofer** protects garments from rain and liquid dirt being suitable for not only equine use but can be used on tablecloths, napkins and outdoor clothing/items
- **AGS Reproofer** forms a very fine film on the surface of the fabric which seals fibres and prevents liquid dirt from penetrating; this creates a powerful hydro-repellent effect

Instructions

Add to the last rinse of wash cycle; 35g for every kg of dry laundry; we would advise the use of peristaltic pumps however if the reproofer is being dosed manually add to fabric softener compartment. Articles can be tumble dried following manufacturer's wash label instructions.
